With every new edition of the Horizons scientific journal the academic public has become used to the expectation that it traces new pathways towards its further establishment in the international educational and scientific-research areas.

For the coming period, just as it did previously, Horizons will continue to respect the principles of scientific impartiality and editorial justness, and will be committed to stimulating the young researchers in particular, to select Horizons as a place to publish the results of their contemporary scientific and research work. This is also an opportunity for those who through publishing their papers in international scientific journals such as Horizons view their future career development in the realm of professorship and scientific-research profession.

The internationalization of our Horizons journal is not to be taken as the furthest accomplishment of our University publishing activity. Just as the scientific thought does not approve of limitations of exhaustive achievements, so is every newly registered success of the Horizons editions going to give rise to new “appetites” for further objectives to reach.

Last but not the least, we would like to express our sincere appreciation for the active part you all took in the process of designing, creating, final shaping and publishing the scientific journal.

Finally, it is with your support that Horizons is on its way to attain its deserved, recognizable place where creative, innovative and intellectually autonomous scientific reflections and potentials will be granted affirmation, as well as an opportunity for a successful establishment in the global area of knowledge and science.

Sincerely,

Editorial Board
